

ZAPBLINK

Zap any LP within 1 Click

Powered By

THE KICKSTARTER OF DEFI

Zap any Liquidity Provider (LP) within 1 Click

The core idea of ZapBlink is to encourage DeFi starters and Cryptocurrency trader to join Defi community, by getting over the concerns of needed multiple platform processes that leads to high gas fee.

LIMITATION and PAIN POINT

Multiple Steps to Make LP

To make 1 LP DeFi farmer needs to do more than 10 steps.

Multiple Time Gas Fee Charge

Every step comes with \$10 charged.

Dust Token Left in Wallet

To make an LP you usually left dust token behind.

INVESTOR ENCOURAGEMENT

ZapBlink shortcuts the whole process into an one-stop service platform

We would like to encourage any kinds of trader and investor to join the DeFi community, for a lastly saving, with fewer steps and less gas fees.

To complete one DeFi on Polygon chain, there are normally 9 transactions required, until your money is saved and ready to earn you return. All transaction require gas fee, also need to be done, by a couple different platforms.

Mission to join DeFi, you need to learn about how it works throughout all the processes, and the usage of needed platforms, also consider the best service platform with lowest gas fee. To invest carefully and finish all the studying, it might takes some times. Wouldn't it better to start with us? **Less transactions, Less study time, and Ready to start!** because we will make a shortcut for you.

Time Gas Fee

Pay only 1 time to start Yield farming

CORE FEATURES and DIFFERENTIATIONS

More Varieties in Product Offering

You can now DeFi with total investment amount that is close to your budget, with one time gas fee.

No More Useless Dust Tokens

Every swap you make, you get the the full amount of your token.
No token is left behind and unused.

CUSTOMER PROFILE

Centralized Exchanges Traders

They trade tokenized stocks on centralized exchanges, for the easier way for them to trade and invest in DeFi is the right direction.

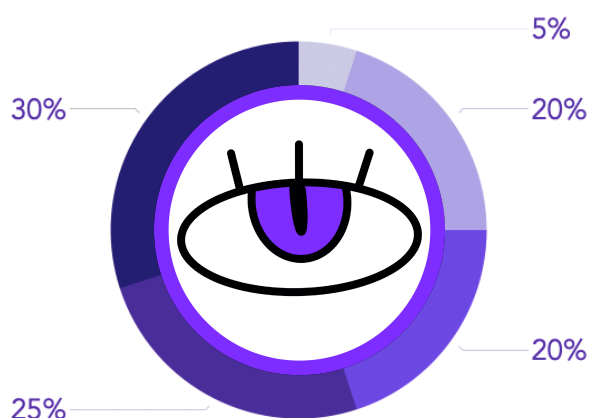

Entry-level crypto investors

Entry-level crypto investors typically hold their assets in stable coins and BTC, which take slow growth, so it is a nice opportunity for them to generate return while holding.

Asian DeFi investors

There are a growing number of Asian investors looking for diversification of their digital assets in various tokens and hedging their local currencies to crypto/DeFi.

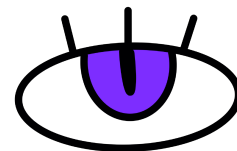

TOKENMONIC

\$ZAP will be governance token for ZapBlink. Its utilities include: platform governance, zapping discounts, incentives for platform participation with plans in the nearest future to use \$ZAP to pay for less fees.
